

TMC Franchise Corporation
Circle K Worldwide Franchise

February 27, 2009

To Whom It May Concern:

Circle K Franchise has worked with Plastic Engineering over the past several years developing a variety of cases and fixtures that are used in franchise stores.

From the prototype to the final design, the staff at Plastic Engineering has worked with closely with the franchise marketing team to develop various products that enhance displays in the stores. We have appreciated the team at Plastic Engineering for their focus on design, their willingness to change elements during development of products, and their fair pricing.

Plastic Engineering has been a recommended vendor for Circle K Stores Inc. and our department for several years because of their customer service and their attentiveness to the specific needs of the franchise department.

Sincerely,

A handwritten signature in black ink, appearing to read 'C Kovacsik', with a long horizontal flourish extending to the right.

Charlene Kovacsik
