Many of our products are available for slatwall, gridwall or pegboard, and some are available with holes drilled for wall mounting. These products are marked with these symbols. If you would like to order an accessory with slatwall mount, add a "Z" to the *beginning* of the product number; for gridwall mounts, add a "G" to the *end* of product number; for pegboard, add a "P" to the *end* of product number; for wall mounting, add "WM" to the *end* of product number. Prices vary product to product.

Z	Slat wall
W	Wall Mount
G	Grid wall
P	Peg Board

Risers

Standard three-sided risers are available in five different shapes: square, long, short, tall, and narrow. For greater stability and a quality look, the larger the size of our risers, the thicker the acrylic material. All risers have finely polished edges.

Acrylic Bin Systems

Create the perfect display for beads, marbles, tumbled stones, or other small items that take up a lot of counter space. Instead of hiding merchandise in boxes and baskets, use these all-clear acrylic bins to give visibility and let light through.

We have several different sized bin systems to meet your needs. Each system is made up of two endpieces and a selection of trays. The trays all have different numbers of glued-in dividers.

To order bin systems, you need to:

- 1) Choose which size system you want: Standard, Wide, Narrow, or Extra-Large. The tray size is the main difference between the systems.
- 2) Choose how many tiers of trays you want in the system.
- 3) Choose from the divided-tray options listed with each system to get the trays with the compartment sizes that you need.

Standard Bins

Our standard bin system is made up of 16"-long trays that are 2 $\frac{5}{8}$ " high and 4" deep. The system includes the trays; choose trays from options below. All systems pack unassembled for easy shipping and come with nylon thumb screws for assembly.

TrackMaster® Picture Hanging Systems

TrackMaster is a unique, patented hanger that enables you to hang metal or wood framed pictures straight and securely. Measuring for placement is easy, and Trackmaster will support heavy pictures and mirrors without utilizing wall studs. The bubble level (included) ensures that pictures will be hung straight and level, and the hanger's support track keeps the picture on level and securely against the wall. TrackMaster eliminates the need for wires and hooks. Bottom rail supports prevent heavy frames from bowing.

Metal-Frame Hangers

Each package contains the hanger, bubble level, bottom rail support, and all hardware necessary for hanging metal-framed pictures. The hanger is 5" wide and will accommodate frames 10" and up. For frames 48" and over, two hangers are recommended.

A base is often the important finishing touch for a collectible or item of merchandise. Many companies use bases to permanently mount their products, such as minerals, fossils, or seashells, or temporarily mount special items. (See the end of this chapter for adhesive and mounting tack.) A base can give a piece a finished look or call attention to its uniqueness. Rough-edged items may benefit from a base. You can create a grouping of several items on a single base, and bases of various heights can create interesting arrangements.

Highly polished, crystal clear bases. You may also order most of our clear acrylic blocks and bases with a frosted finish. The price is the same, but you need to indicate your choice by adding an "F" to the item number (for example, #F44F).
